PROJECT

ACADEMIC REQUIREMENT FOR UNIVERSITY

3/2023 - 4/2023

Team project - Leader (Project manager, back-end developer)

- The app helps departments manage staff by filtering ideas by department, category, and event. Staff can create hashtags for their ideas and events have two deadlines. Ideas can be liked or disliked and sorted by popularity. The dashboard provides real-time updates and important data.
- Programing language: Nodejs
- Link project: <https://github.com/Luaconlonton/group1-web-enterprise?fbclid=IwAR01mtF7AkBJH6XuQgQi9Yu92AHnHRncApP-caukpuPR8FvrizRNTSB4Q7o>

FREELANCER HIREMENT WEBSITE

4/2023 - 5/2023

Final individual project - Leader (Project manager, back-end developer)

- A freelancer hiring system is a digital platform that streamlines the process of hiring and working with freelancers. It offers various tools to identify, connect with, and manage freelancers, including posting and searching for gigs, handling payments, managing projects, and securely sharing files and data.

- Programing language: Nodejs, **Reactjs**, MongoDB
- Link project: <https://github.com/haminhhai/freelancer-hire>
