 Thu Duc, Ho Chi Minh City

SKILLS

- Android Development
- Java, Kotlin, Dart, C/C++
- REST APIs (Retrofit)
- Database (SQL, Firebase)
- Ability to read and understand English
- Ability to analyze and solve problems
- Ability to write documents

EDUCATION

2019 - 2024

*Posts and Telecommunications
Institute of Technology (PTIT HCM)*

- Major: Information Security
- Fourth-year student

TRAN TU MINH

ANDROID DEVELOPER

SUMMARY

- As a person with a passion for programming, specifically in the field of mobile application development, I have good self-learning and research abilities. I have knowledge of Android and Flutter, and expertise in popular languages such as Java, Kotlin, C/C++, and Dart. I have a good understanding and awareness of issues such as design pattern, Dependency Injection(Koin,Hilt,...), clean code, code maintenance, data storage, Thread(Coroutines, AsyncTask,...), architecture model (MVP, MVVM,...) and client-server network models.
- As a disciplined and hardworking person with a thirst for knowledge, I always want to work in a dynamic and challenging company environment to gain practical experience and develop myself for the future.

WORK EXPERIENCE

Micro Company (11/2022 - 01/2023)

- I have learned about the company's operations and gained soft skills from the company.
- I have worked on a practical project using Flutter with a team.

School Activities (2019 - Present)

- I was a member of the Information Security Academic Club at school.
- I have completed several group projects for web and mobile application development at school.

CERTIFICATE

04/2022 - 07/2022

Android Crosstech Course

Basic Android Degree Course

04/2022 - 05/2022

Linux Essentials TEL4VN,Crosstech Course

Linux Essentials Degree Course

PROJECT

Sale Management App (05/2023 - 06/2023) - Java

Client	Group Project
Descriptions	<ul style="list-style-type: none">• The topic is managing the buying and selling of products online, similar to Shopee.• Study the mobile application development course at school and do a project to finish the course• The application is coded in Java language• Was the team leader responsible for the project and worked with a team of 5 people.
Number of members	5
Position	Developer
Responsibilities	<ul style="list-style-type: none">• Project management and tracking progress.• Assigning tasks to team members.• Build Front-End• Build Back-End
Technology in use	<ul style="list-style-type: none">• Frontend: Java Android• Backend: Sqlite (Strapi)• Dependency Injection: Hilt• Architecture: MVVM• Github:https://github.com/Rythmzz/shop_puka

Sale Management App (06/2022 - 07/2022) - Kotlin

Client	Personal Project
Descriptions	<ul style="list-style-type: none">• The topic is managing the buying and selling of products online, similar to Shopee.• Learn programming android Crosstech course and do the project to get the certificate• The application is coded in Kotlin language
