EXPERIENCE

12|2022- Current

MQ-HOUSE | 2 Tran Quang Khai, Q.1, Ho Chi Minh
Apartment Rental Consultant

Advertising and Customer Acquisition Specialist for renting corporate-owned or partner-owned apartments. Analyze customer needs and provide precise advice on the best apartment choices based on budget and specific criteria.

6|2022 - 10|2022

Healthy Heart Project
Mobile App Marketing Specialist

Mobile App Promotion Specialist. Conduct free blood pressure measurements at pharmacies and introduce the smart blood pressure monitoring app, an application that not only helps you easily check and track your health.

SOFT SKILLS

- Communication skills: Good communication skills to convey information and opinions in the working process
- Logical thinking: The ability to reason and solve problems in a logical and systematic way.

PROJECT

WebKhachSan

01/2023 – 03/2023

- Create a website that allows customers to browse and book hotel rooms based on their preferences. Provide administrative support for hotel management, including updating, adding, and deleting rooms. Additionally, support front desk staff in managing rooms, check-ins, and check-outs.
- Technology used: Python Flask, Cloudinary, HTML, JavaScript, CSS, MySQL
- Project Link: <https://github.com/hoangan2403/WebKhachSan>

QuanLySinhVien

07/2023 – 10/2023

- Create a website that supports the management of students and faculty members who are studying and working. Develop training programs that allow students to enroll in courses. Assist faculty members in managing students in their classes, overseeing the courses they are responsible for, and facilitating the input and updating of grades for each course. Students should be able to access the website to view their grades and engage in discussions with faculty members on forums.
- Technology used: Java Spring MVC, Reactjs, HibernateSQL, MySQL, Cloudinary, Javascript.
- Project Link: <https://github.com/hoangan2403/QuanLySinhVien>

Social Network

12/2023 – Current

- The social platform for charitable activities is built using Python Django at the backend and React Native for mobile applications. It allows users to post content, initiate charity auctions, participate in these auctions, and report users or posts for a safer community environment. Admin functionalities include user management, content monitoring, and oversight of charitable activities within the platform.
- Technology used: Python Django, React Native, MySQL, Cloudinary, Javascript.
- Project Link: <https://github.com/hoangan2403/SocialMedia>
