- filter post by author/category
- darkmode, theme changeable
- fake payment

1/2024 - Now

PROJECT NAME: WebsiteTruyenChu

Team size: 1

TECHNICAL STACK:

ASP.NET MVC 5, CSS, Bootstrap, JQuery, SQL Server

Operation: The website is a text-based story platform that manages a large quantity of stories with diverse genres and authors. It provides various search and filtering functions to help readers easily find stories of their interest.

Additionally, readers can interact with each other through a chat channel for discussions and exchanges.

MY POSITION IN PROJECT: BACK END DEVELOPER

PROJECT DESCRIPTION:

Github:

<https://github.com/noname2k1/WebsiteDocTruyenChu>

FEATURES:

- user authentication & authorization using Session
- user, story, chapter management
- filter story by author/category/chapter/rank/status
- realtime chat using SignalR
- darkmode

REFERENCES

Strengths: I have a passion for exploration, learning, and researching new technologies. I am honest and loyal in my work. I have some knowledge in areas such as databases, front-end development, back-end development, and Cloudinary.

Weaknesses: I lack experience in real-life projects; therefore, I am eager to enhance my skills and learn from experienced individuals through various projects.
