PERSONAL PROJECT

Electronic Online Shopping
AN ONLINE SOCIAL NETWORKING WEBSITE

Member: 1 - Role: Leader
  • Technologies: PHP, MySQL,ReactJS , Node.Js, Javascrip. Responsive and Grid System
    - Front-End: HTML,CSS.
    -Back-end: JAVASCRIP, SASS,C++,JAVA,ReactJS,MySQL
    - Function description:°Login, register, logout, change password
    -CRUD post, group, page, comment...°Friends,block.request processing...
  • Develop an online shopping platform for electronic devices using Loravel
  • I created a user-friendly platform that enables people to register, purchase items, and effortlessly finalize their   orders. The platform comes with an Al chatbot for support, multi checkout method, e-wallet. Additionally, it   features a dedicated dashboard for managing products, orders, users, multiple levels of categories, coupons,   and real-time chat communication between administrators.
